

Diagnostic systems

Agenda

- Who are we
- Why do we want to participate in IAP
- How do we want to participate

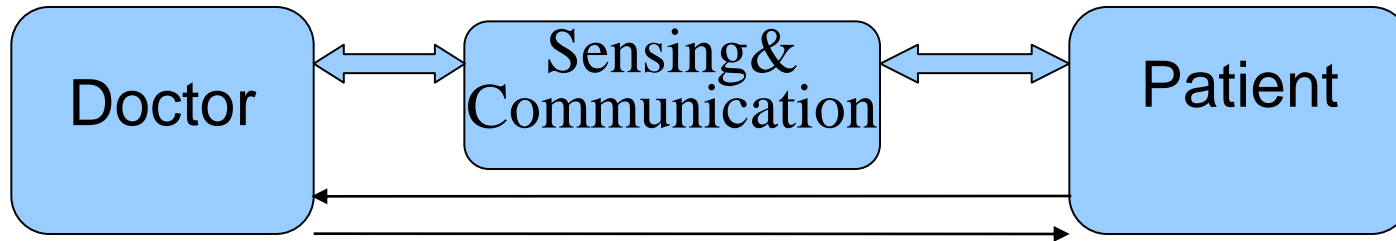

Who

- Chipinvest a.s. is a joint stock company founded in 2005 with the aim to develop and commercialization of diagnostic and integrated microsystems
- Our solution is used by private clinics to give their patients the choice of being healthy in natural way (first reference PPF Healthcare)
- We fully repaid the seed funding and developed the planned device
- We generate profit from the first year (110 K USD for 2009)

Stakeholders

- 1) Current co-operating clinics in Prague and Brno
- 2) To be implemented – Global Telemedical Networks
- 3) Czech Technical University
- 4) Charles University
- 5) Industrial partners ready to support the implementation of the integrated systém

User requirements

Integrated diagnostic system

application:

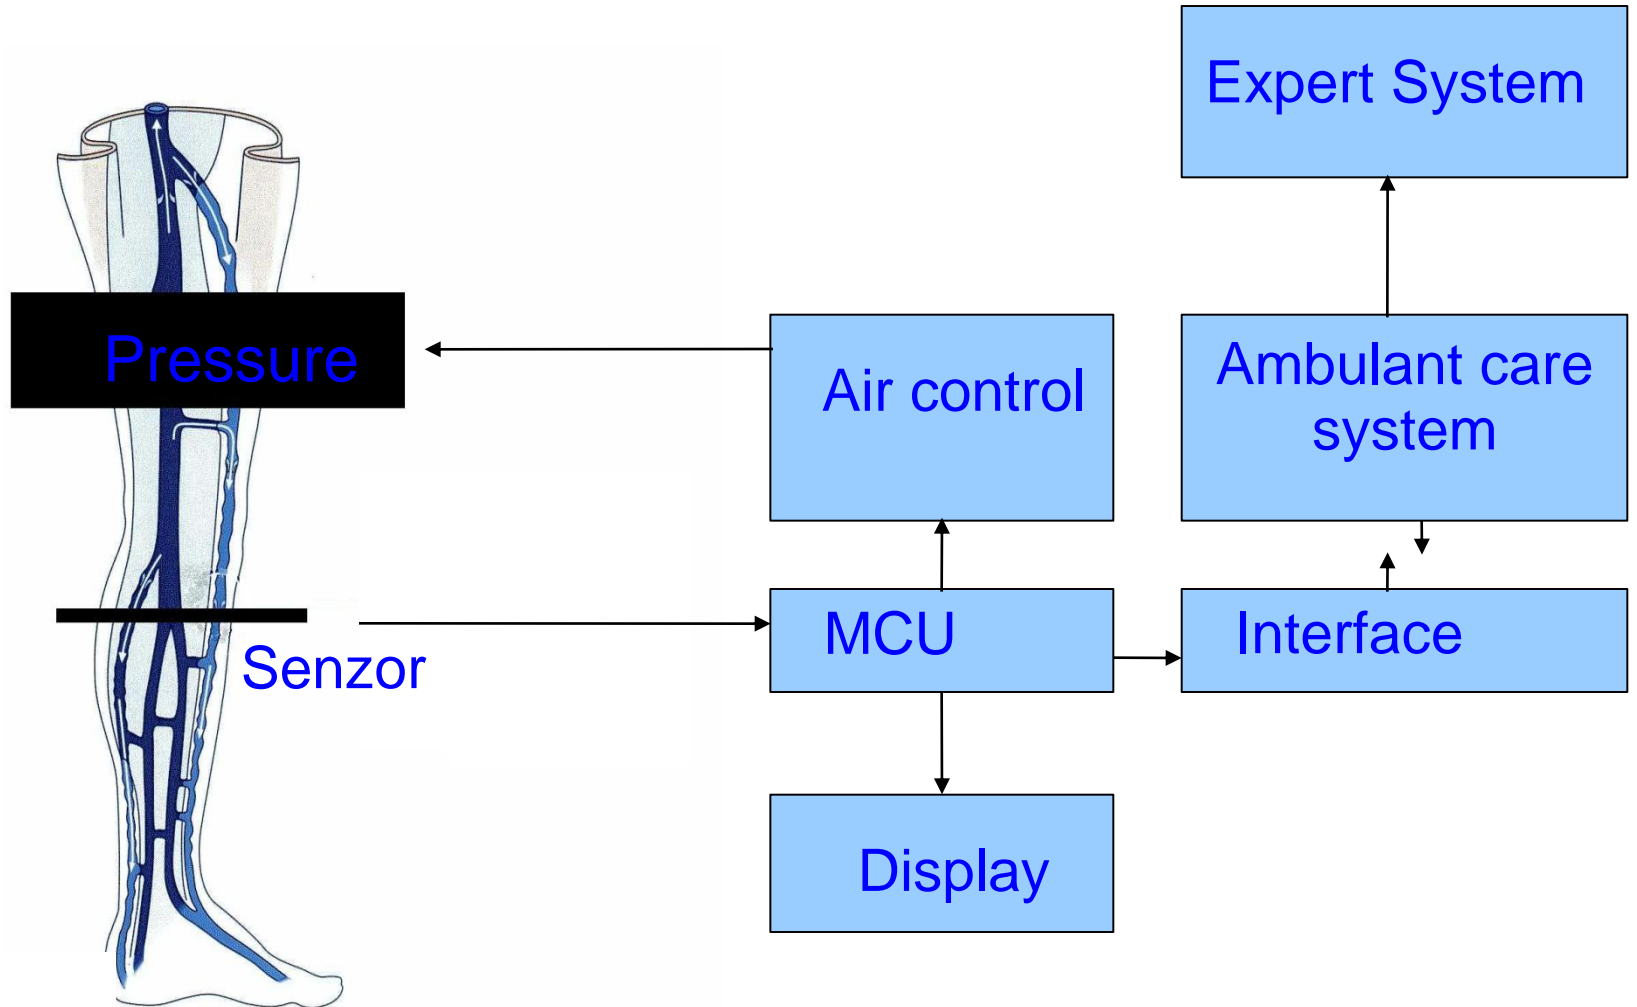

integrative solution for prevention, early detection and monitoring

Technology Focus:

- portable, home and ambulant diagnostic microsystems
- integrated information system from the signal till the report
- user friendly telemedical solution

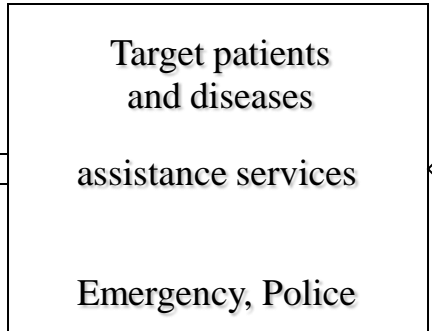

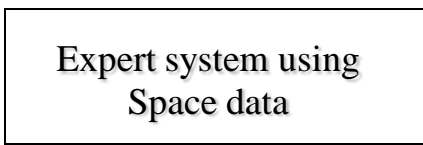

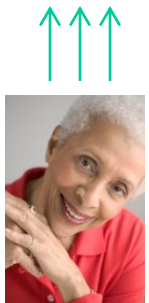

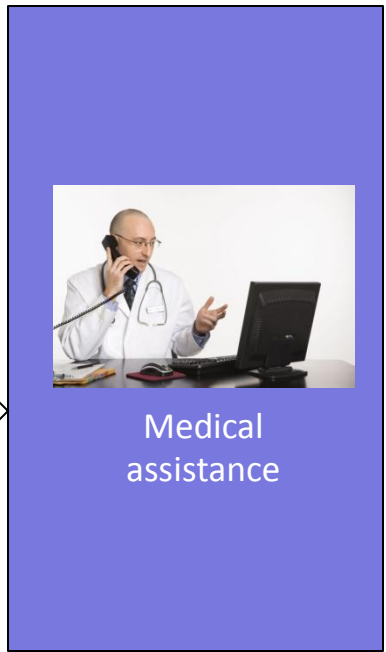

Example - Ischemic disease

Transfer

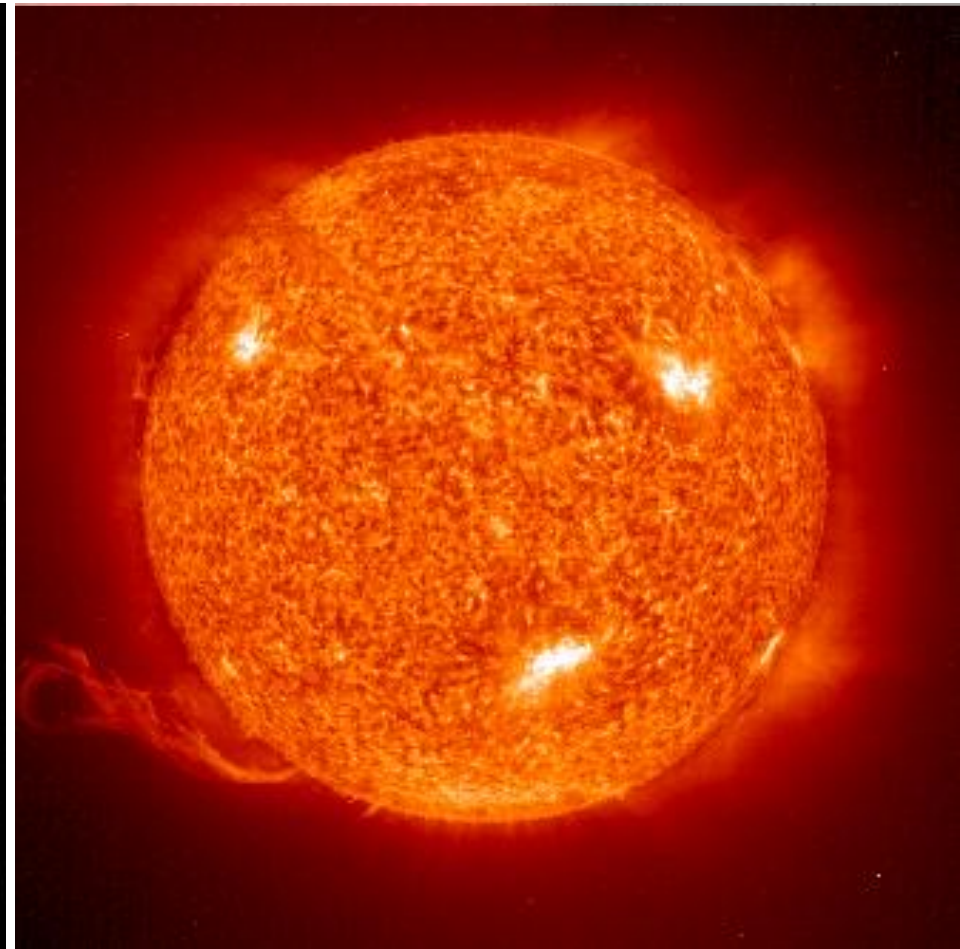

Space segments

1) Satcom

2) Earth Observation + remote sensing

3) Satnav

Energy for new life
