Promoted by the Torino Chamber of Commerce within the project Torino Piemonte Aerospace.

Piemonte is Italy's most advanced and skilled aerospace region and home to the country's five most prominent actors: Alenia Aeronautica, Thales Alenia Space, Avio, Selex Galileo and Microtecnica.

These large companies have extensive cooperation agreements with the Torino Politecnico University, a qualified reference in the aerospace context, as well as with the Torino Engineering Association, with over 5.500 members.

In addition to this, the region boasts the presence of an industry specialised in the production of components and functional systems and a large number of SMEs and technical service companies.

Technology at a global level:

The five Piedmontese aerospace companies, together with the sector's leading international firms, take part in the most innovative programmes: A380, B787 Dreamliner, Typhoon, the new JSF fighter, the space station, the Crew Exploration Vehicle, the GOCE satellite, and the largest European rocket launcher, Ariane 5.

BCI Aerospace is Groupe Adhesion specialized division for the aeronautics, space and defence industries. The company was established in 1984 and currently employs a staff of 100 people based out of the headquarters in France, and also in offices in Italy, Great Britain, India and China. With a portfolio of over 80.000 customers, the company has organized over 1.100 events in a wide range of domains including aerospace, automotive, industrial processes, micro-technologies...
