

Title of activity	Type	Contractor
Preparatory study of digital plasma wave analyser technology for Cosmic Vision Spacecraft	Flight Hardware	Institute of Atmospheric Physics AS CR
Neutron Facilities in the Czech Republic for Calibration and Testing of ESA Compliant Neutron Sensitive Devices	Service	Czech Technical University in Prague - Institute of Experimental and Applied Physics
Highly Miniaturized and Sensitive Thermal Neutron Sensor	Flight Hardware	Czech Technical University in Prague - Institute of Experimental and Applied Physics
Hermetically Sealed Low ESR Tantalum Capacitor (Flight Hardware Activity)	Flight Hardware	AVX Czech Republic
Laboratory Wide Dynamic Range Gamma-Ray Calibration Facility	Service	Czech Technical University in Prague - Institute of Experimental and Applied Physics
Real-time Performance Monitoring Tool	Software	Iguassu Software Systems
Preparatory Activities for MTG Framework	Flight Hardware	CSRC
UrbanAtlas+	Software	Gisat
Study of SCOS-2000 deployment over WAN for concept of CMCP	Software	ANF DATA
PaIDMC	Study	Iguassu Software Systems
Langmuir Probe Experiment	Flight Hardware	Astronomical Institute of AS CR
New acousto-optoc device based on Calomel for hyperspectral imaging in space applications NAOMI	Hardware	BBT-Materials processing
Control and Tracking system for ground station antennae	Software	ProjectSoft HK
Real-time Extrapolation Methods for Thermal Testing	Software	L. K. Engineering
